PROFESSIONAL PROFILE

Computer Science undergraduate focused on building agentic AI systems that move beyond conversation to structured tool execution. Experienced in designing multi-step LLM workflows using Groq-hosted models and Gradio interfaces, with emphasis on reliability, controlled execution, and reasoning transparency. Interested in engineering secure, autonomous systems for high-stakes domains such as cybersecurity and scientific data analysis.

EXPERIENCE

Emerging Technologies Intern – Microsoft Elevate × AICTE [February 2026 – March 2026]

- Participating in a structured internship program focused on data analytics and visualisation using Power BI, building interactive dashboards and applying data modeling techniques for business insights.
- Gaining exposure to industry-oriented workflows and structured problem-solving methodologies

TECHNICAL SKILLS

Programming Languages

Python
Java
C++
HTML
CSS
JavaScript

Computer Science Fundamentals

Data Structures & Algorithms
(Foundational level)
Object-Oriented Programming(OOP)
Problem Solving
Time & Space Complexity (Basic)

Tools & Platforms

Git & GitHub
Visual Studio Code
HackerRank
Groq & Google Collab

Databases

MySQL

AI

Large Language Models
Agent-Based Workflows
Basic ML Concepts

PROJECTS

Agent-Based Sales Lead Qualification System

Designed an agent that evaluates structured, unstructured lead data to rank and justify high-potential prospects. Implemented filtering, scoring logic, and explanation.

Agent-Based Research Copilot

Built a unified, agent based LLM reasoning with external tools for topic exploration, AI content detection, and word count.

AR- Based Heritage Villages

Developed an augmented reality storytelling system integrating spatial overlays and contextual metadata. Exploring formal documentation toward research publication.

- Ongoing Research initiative presentation at ICMSCI on 6G Networking- reducing the risk of attacks with ultra low latency
- Runner-up — Geenovate 2K25 Hackathon (2025)
- Second Runner-up — Gen AI Hackathon in collaboration with NASSCOM (2026)
- Qualifier — Smart India Hackathon (SIH) 2025 Internal Round
- Qualifier, Agentathon by GDG Hyderabad (2025) – Part of a Guinness World Record holding event

ADDITIONAL INFORMATION

- PR Member, Google Developer Student Club (GDSC)
- Member, Cyber Security Club
- Creative Designer Member, IIC Student Council
- Active participant in extra curricular and stage activities
- Academic CGPA: 8.7
